AIR CRASH INVESTIGATION

Creator event by AIAA

Step into the role of an aviation investigator in this unique challenge! Teams will analyze a simulated aircraft accident case using real-world methods and data. Participants must review evidence, identify root causes, and propose preventive measures. After case analysis, shortlisted teams will present their investigation report to a jury of experts. The event sharpens analytical thinking, communication, and teamwork while offering a real-world taste of aviation safety practices.

INSTRUCTIONS:

- **Open to all students**
- **Teams of 2–4 participants.**
- **All work must be original.**
- **Use only the provided case materials and public sources.**
- **Follow time limits and report format.**
- **Teams must adhere to time limits strictly.**

Teams will be judged on depth of analysis, accuracy, feasibility of recommendations, clarity, and teamwork.

This competition provides a unique opportunity to learn aviation safety practices and investigative methodologies.
