Circuitopia

ELECTROXCAPE

Visionary Event by Circutopia

ElectroXcape is not just another competition – it's an electrifying journey where logic meets innovation! It is a dynamic and immersive electronics competition designed to bridge logical reasoning, your understanding of core electronic hardware, and creativity in circuit design.

From building circuits with nothing but logic gates, to decoding Encrypted codes into real-world sensor prototypes using arduino, and finally mastering the art of PCB design – every round pushes your creativity, skills, and problem-solving to the edge.

Register now to Xcape into your creativity!!

INSTRUCTIONS:

- **Open to all students.**
- **Participants must bring laptops with pre-installed software as follows:**
  - **Tinkercad**
  - **Arduino IDE**
  - **PCB Design Software (KiCad)**
- **Task-specific rules will be shared post-registration.**
- **Any damage to equipment or instances of misbehavior will lead to immediate disqualification.**
- **Hardware, ICs, and sensors will be provided during the event.**

Participants will face three qualifier rounds, followed by a surprise finale round, with exciting prizes.

ElectroXcape promotes collaboration, real-world application, and creative engineering problem-solving.

Faculty: Mr. Divya Kiran - 89716 38139

Student: Kushal M K - 86188 44218

Akash Arumugam - 96066 94466
