RAMAIAH UNIVERSITY OF APPLIED SCIENCES

INSTITUTION'S INNOVATION COUNCIL

MYDEACINE

Explorer event RMC-IIC

Innovation in healthcare begins with fresh ideas. This event invites students to explore the intersection of medical sciences and technology by tackling real-world problem statements. Participants will brainstorm, design, and present their solutions through models, posters, or short videos, showcasing creativity, feasibility, and innovation. It's a platform to collaborate, think critically, and bring impactful medical ideas closer to reality.

INSTRUCTIONS:

- **Open to all students**
- **Teams must consist of 2–4 members (inter-faculty teams are also encouraged)**
- **Problem statement will be shared in the WhatsApp group to each team. A paragraph/concept note of the idea will have to be submitted before the event day.**
- **Presentation formats: prototype, poster, or short video.**
- **All teams must showcase their work on the day of the event.**
- **Participants should carry laptops/pen drives (if required) and any prototypes, posters, or visual aids for the presentation.**

Judging will be based on innovation and creativity, relevance to the medical field, practical feasibility, presentation and clarity, and team collaboration, ensuring a balanced evaluation of both ideas and execution.
