SCRAPYARD WARS

Creator event by ASME

Unleash your creativity in this unique challenge where participants design and build a catapult using only scrapyard materials. The competition highlights innovation, practical mechanical design, and the art of making the best out of waste. Each catapult will be tested for performance, rewarding not just functionality but also originality and aesthetics. This event is the perfect blend of hands-on learning and engineering creativity.

INSTRUCTIONS:

- **Open to all Diploma and UG students.**
- **Solo participation only.**
- **Entries must be the original work of the participants.**
- **Only provided materials may be used.**
- **Copying designs from any source will lead to disqualification.**
- **Time management and adherence to schedules will be strictly monitored.**

Entries will be judged on parts selection, design, working, application to problem, and aesthetics.

Faculty: Dr. Ananth S. Iyengar - 94803 43844
Student: Ranganatha. K. - 74833 53883
Akash. C. Y. - 79961 86641
