RAMAIAH UNIVERSITY OF APPLIED SCIENCES

INSTITUTION'S INNOVATION COUNCIL (Ministry of Education Initiative)

SKYHACK

Creator event by IIC

SkyHack is a one-day hackathon where creativity meets technology. Participants must propose drone-based solutions to real-world challenges across domains like agriculture, logistics, and disaster response. The competition unfolds in three rounds: problem reveal & ideation, AI-powered drone design with pitch deck creation, and a final pitch to the jury. No coding is required—only innovation, design thinking, and clear communication.

INSTRUCTIONS:

- Open to all students
- Participation can be individual or in a team (2-3 per team).
- The event is structured in two rounds.
- After Round 2, pitch decks must be submitted on time and cannot be changed.
- Pitch decks must include live specifications announced during the event.
- Organizing committee decisions are final and binding.

Ideas will be judged on image relevance, pitch deck creation, visual appeal, solution fit, and drone capability.
