WINDRUSH

Creator event by Aeronyx

Wind Rush Challenge is a glider competition where: Participants must design, build, and fly a hand-launched foam glider that stays in the air as long as possible. The glider must be made only from foam and must be built before the event.

INSTRUCTIONS:

- No electronics, power assistance, or paper planes are allowed.
- The maximum allowed size is 40 cm × 40 cm.
- The glider must weigh 100 grams or less.
- Each glider must be launched by hand without running.
- Each participant gets one attempt per round.

The competition has two rounds

The scoring formula is: (Time of flight / Weight of glider) × 100
A spare glider of the same design can be brought in case of damage.

Winners are decided based on final round scores.
